

## Supported DAI Video/Audio File Formats By Computing Device

(Draft June 20, 2011)

Device Type	Browser / Device	Video Formats		Audio Formats	
		HTML5+H264.MP4	Adobe Flash	HTML5+MP3	Adobe Flash
Desktop	Internet Explorer 9.0	✓	✓	✓	✓
	Internet Explorer (Legacy Versions)	✗	✓	✗	✓
	Firefox	✗	✓	✗	✓
	Chrome (+ WebKit browsers)	✓	✓	✓	✓
	Opera	✗	✓	✗	✓
	Safari	✓	✓	✓	✓
Tablet / Phone	iOS (iPad, iPhone)	✓	✗	✓	✗
	Android	*✓	*✓	*✓	*✓
	Blackberry Phone	*✓✗	*✗	*✓✗	*✗
	Windows Phone 7	*✓	✗	*✓	✗
	Blackberry Playbook	✓	✓	✓	✓
<p>*✓✗ Select models of these devices contain support. "Most" modern Android devices support HTML5, many support Mobile Flash. Some Blackberry devices running modern WebKit-based browsers ("Blackberry 6 OS") support some HTML5, no Blackberry devices support Mobile Flash. Firefox and Opera do support HTML5 elements but are not willing to support any formats that are patent encumbered. Because the MP3 format and the H264 MP4 format are both patent encumbered, Firefox and Opera do not currently natively support them.</p>
