MUN CONFRS FIRST PH.D.'S

During the 21st Convocation, the Vice-Chancellor, Lord Taylor, conferred the first Doctor of Philosophy degrees upon two graduates. (Above) Miss Helen Elizabeth Bradbury of St. John's is congratulated by Lord Taylor for receiving her Ph.D. in Biology. Miss Bradbury is a graduate of Bishops College and received a B.Sc. and B.Ed. from Memorial in 1967. (Below) (Mrs.) Leona Marie Deorksen of Grand Falls became the first Ph.D. in English. Having completed her high school education in Edmonton, Alberta, she received her B.Ed. degree with distinction from the University of Alberta in 1966. Looking on is Dr. Leslie Harris, Dean of Arts and Science.

JUNIOR DIVISION DEAN ASSISTANT DEANS NAMED

Lord Taylor, President and Vice-Chancellor of Memorial University, has announced the appointments of a Dean and two Assistant Deans for the Junior Division.

Dr. Arthur M. Sullivan has been appointed Dean of Junior Studies while Dr. E.H. King was appointed Assistant Dean (Arts) and Mr. E.J.F. Hodgett Assistant Dean (Science).

Born in Trinity, T.B., Dr. Sullivan graduated from Memorial University in 1954 with a B.A.(Ed.). He received his M.A. in 1956 from Dalhousie University. In 1957, he was named Rhodes Scholar for Newfoundland. He graduated from Oxford University in 1959 with a B.A. On his return to Newfoundland, he took a position with the Hospital for Mental and Nervous Diseases in St. John's.

Dr. Sullivan joined the faculty of Memorial in 1960 as Assistant Professor of Psychology. Later he attended McGill University where he earned his Ph.D. in 1964. He then returned to MUN where he headed up the Department of Psychology.

In 1968, he was appointed director of the Institute for Research in Human Abilities. He is the past president of the Atlantic Provinces Psychological Association, a director of the Canadian Psychological Associa-
Excerpts from the Address to Convocation on May 23 by the Rt. Hon. Lord Shackleton, Lord Privy Seal and Leader of the House of Lords.

"Because I am Minister in Charge of the Central Management of Government, the Civil Service Department, I have concern with the shape of the use of science within the public service, as well as the general machinery of Government. And here I find a life-long addiction to science fiction of some value, particularly in extending an all too short time scale against which to examine the conduct of our affairs. This provides a certain perspective to contemporary controversy.

"A Government lasts in Britain for less than five years, yet we have a few thousand million years yet to go on earth, if we don't destroy ourselves. There is a well-established theme in science fiction. The reason we have never made contact with more advanced civilizations in this galaxy, or other galaxies, is not merely the theoretical limits imposed on the speed of space travel within the speed of light, but the simple sociological concept, the technological advance tends to be greater than spiritual advance, and technologically advanced civilizations therefore end up by destroying themselves, either through warfare or by the heedless and inadvertent destruction of their environment.

"We need to bear these thoughts in mind; to allow our imaginations to stretch a bit further; to run the risk of being unrecognized prophets.

"I remember in our Parliamentary and Scientific Committee in the early fifties suggesting we should have a semester on space travel. An embarrassed silence followed. One of my Lancashire colleagues said, "We ought to keep our feet on ground." Somewhat dashed, I withdrew the suggestion and proposed a seminar on the International Geophysical year.

Yet, within two years, during the course of the Geophysical year, the first satellites were put into orbit, notwithstanding the fact that the Astronomer Royal had previously said space travel was bunk, and a distinguished scientist who had proved, in a way he thought to be conclusive, that space travel was impossible.

"Let me hasten to add we cannot believe every prophet, and, sometimes, prophesies, especially if they are doom-laden, can become a bore. Yet there have been voices raised for many years on the importance of preserving the environment, the fears of pollution, excessive use of pesticides, so many of them met with bland indifference by governments and officialdom. When, along with Julian Huxley, I wrote the introduction to the English edition of Rachel Carson's "Silent Spring", we were condemned for supporting science fiction."

"I do not doubt that in Newfoundland you have problems of conservation, despite the great areas of beautiful wilderness. You certainly have problems of pollution. Let me hasten to add that the conservationists, after years of frustration, can lose all sense of proportion, and there is a need for a proper balance. But one cannot hope to get that balance unless the politicians and the public at large have some understanding of the problem.

"This raises profound issues that come back to our systems of education. The need to combine specialized professionalism with the general culture which must include some understanding of the natural sciences, as well as of the literature and art of the world. It is, however, an irrefutable fact that the social sciences, and in particular the behavioural sciences, have yet to make the contribution which in time I am sure they will. Furthermore, politicians and administrators are not aware enough of their importance, or for that matter the dangers of too naive theory in this area. We may apply new psychologies to help us in the selection of the managers, but not in the selection of politicians or Governments.""
Lord Shackleton's Address...

can best be made in the light of sophisticated factual analysis. Politicians may still quite rightly decide against the lowest cost solution in favour of something which, for example, benefits an area of high unemployment or improves relations with a valued overseas ally, but they will know the extra cost of such decisions. The analyst, in short, becomes an important element in reaching the final consensus and his studies and the personal advice of outstanding individual analysts will tend to move the decision in the direction of cost effectiveness.”

"Let me conclude on a note of optimism. We see, in advanced societies, a loss of certainty. Suddenly, the universe appears less rather than more secure. There is a greater rejection of authority, and it becomes apparent that establishments and established methods are inadequate to achieve immediate perfection on earth. With this new critical approach, prophets rise and fall. Marcus provides, for a short time anyway, a new and more contemporary interpretation of Marxism. And, let me add, it is nearly as tedious to read. Che Guevara becomes a heroic figure, and an inspiration to many, but ends as a legend. On the other side there is the continual search for efficiency. But against this, the behavioural scientists are still in dispute on such fundamental matters as motivation.

"On the one hand, one can look at present day society, and the awful things that happen, and reject it entirely. On the other hand, a stable society that can adapt, surely provides a better life for most people than an unstable one. It was, I think, Anatole France who said that where Government is weak, the people are oppressed. I believe that we can achieve the right balance, in Government, in institutions, in the same way that we must seek the right balance in our environment. We can have strong institutions which must accept the necessity of criticism and protest. Protest in the body politic is the pricking of conscience in the individual and since it is the young who especially must provide that conscience, we must not overdo the lecturing of the young on their duty. They will be much more inclined to judge us by our own outlook and achievement. They may even be influenced by our tolerance to them. We need to remember that at times we can be more annoying to them.

President's Speech....

"During the past year, many other universities have been torn with strife and campus upset. At Memorial we have been working hard, achieving much and enjoying ourselves. Herein perhaps lies our secret. At so many universities nowadays, there is a cult of misery; to enjoy oneself is regarded almost as though it were immoral. There seems to be a loss of sense of proportion, and, above all, a loss of sense of humour. Universities ought to be happy places where one has the time of one's life.

"Our achievement at Memorial is a joint achievement. We are blessed with an excellent staff, who treat their work as a true vocation, and we are blessed indeed in our students. So our achievement is something to which we all make a contribution. The whole purpose of our University society is expressed in the careers of our graduates - of you who are graduating today. Your link with the University is symbolized by the existence of Convocation, and your Alumni Association. Within the last month, two young graduates, distinguished and vigorous Alumni, have been elected by Convocation to the Board of Regents. This is indeed a good thing.

"This also brings me to my final observation. You who are graduating provide the living link between our Province and the University. But it is a long-term link. There have to be day-to-day links too. Since the Province pays for the University, it must have trustees to see that the University spends its money wisely, and follows its courses well. These trustees are our Board of Regents. They are citizens of St. John's, and of the Province as a whole, who serve the University in a special way. They give of their time and skill and understanding to guide us in our endeavours. On behalf of all of you, I would thank the Chairman and Vice-Chairman, and members of our Board of Regents, for the fine work they do, and for the special place they have in our society."
Dr. King is married to the former Joyce Lamswood of Bell Island and they have two children.

Born in New Bonaventure, T.B., Dr. King attended Bishop Field College and entered Memorial University in 1952. He received a B.A. in 1956, an M.A. in English in 1958 and a Diploma in Education in 1959.

From 1959 to 1963 he taught at the Queen Elizabeth Regional High School in Foxtrap during which time he served a term as vice-president of the Newfoundland Teachers' Association.

Dr. King was awarded a Rothermere Scholarship in 1963 to pursue his Ph.D. studies at London University. He received his degree in 1965 and was appointed Assistant Professor of English at the University of Manitoba. In 1968 he became Associate Professor of English at Laurentian University, Sudbury, Ontario.

He returned to Memorial in 1969 as Associate Director of Junior Studies and Co-ordinator in English in the Junior Division.

Dr. King is married to the former Joyce Lamswood of Bell Island and they have two children.

Born in Lurgan, County Armagh, Northern Ireland, Mr. Hodgett graduated from Methodist College, Belfast, and entered Queen's University. He graduated with a B.Sc. in Physics from that Belfast university in 1949. He then entered industry, carrying out research in textiles.

In 1959, Mr. Hodgett returned to Methodist College and taught there until 1966. He obtained a teaching certificate from London University and taught at Stranmillis College of Education in Belfast. In 1968, he came to Memorial University as a Lecturer in Physics in the Junior Division.

Mr. Hodgett is an Associate of the Institute of Physics, London. He is married with three children.
FIRST B.S.W. DEGREES AWARDED AT MEMORIAL

The first professional degrees in Social Work ever to be awarded by the Memorial University of Newfoundland were conferred upon two students at the 21st Convocation, May 22.

The graduates were Miss Jean Brown and Miss Elaine Duggan.

Dr. Norman Flachs, head of the Department of Social Work, said that five people took the Bachelor of Social Work course this year. Two students graduated at Convocation, two were special students from the provincial Department of Social Services and Rehabilitation and another student is to graduate later this year. Miss Jean Brown, B.S.W., has already been accepted into an advanced standing Master of Social Work programme at Dalhousie. Fifteen students have already been accepted for the programme next year.

Dr. Flachs said that Memorial is one of only seven universities in Canada which has a Bachelor of Social Work programme. The University is accredited with both the Canadian and United States accrediting bodies for social work education.

The course offered at Memorial spans five years, four years after Junior Studies. After the third year, a student will be completely ‘locked’ into the Social Work programme.

“What we are trying to do is to help develop the quality of the delivery of social services in Newfoundland and in the rest of Canada by graduating fully trained and qualified people,” Dr. Flachs said.

MEDALS AND AWARDS

The Governor General’s Medal ............... Thomas John Deorksen
The Birks Medal ........................................ Margaret McCurdy
University Medal in Biology .................. Sandra Ann LeSelleur
University Medal in Chemistry ............... Gordon Robert Wight
University Medal in Economics .............. Thomas John Deorksen
University Medal in English ................... Margaret McCurdy
University Medal in French .................... Barbara Anne Russell
University Medal in Geology ................... Ronald George Peters
University Medal in Greek ..................... Irene Cecilia Marcus
University Medal in History ................. Patrick Samuel McKeever
University Medal in Mathematics .......... Anne Marie Power
University Medal in Philosophy ............. Antoinette Marie Stafford
University Medal in Physics ................... Douglas Howard Pitcher
University Medal in Psychology .......... Ross Morris Gerald Norman
University Medal in Political Science ......... Oldric Noel Clarke
Newfoundland Teachers' Association Medal .... Edward Warren Cole
The Grolier Limited Book Award ............. Donald Iain Fraser McKay
The Captain Robert A. Bartlett Science Award .......... Gordon Robert Wight
The Captain George C. Whiteley English Prize ... Augustus George Lilly
The Society of Chemical Industry Award .... Gordon Roubert Wight
The Grolier Limited Book Award in the Faculty of Education .... Ruby Sandra Cluett
The Swiss Ambassador's Prize in French ........ Sister Lorraine Michael
The Swiss Ambassador's Prize in German .... Rosalind Norma Rowsell
The Canadian Association of Social Workers (Newfoundland Branch) B.S.W. Award ........ Jean A. Brown
The Margaret Fitzpatrick Morgan Medal in Nursing .... Maureen Anne Milley
EXTENSION DIRECTOR ELECTED CADESS PRESIDENT

Mr. Donald Snowden is the President-elect of the Canadian Association of Departments of Extension and Summer Schools.

Mr. Snowden, Director of Memorial’s Extension Service, was elected at the recently held CADESS annual meeting on campus.

Some 50 delegates representing extension departments from universities from across Canada met June 2 through 4 at Hatcher House, Paton College.

One of the highlights of the conference was the presentation made by MUN’s Extension Service on its work in community development throughout Newfoundland and Labrador.

Mr. Snowden will take up his duties in 1971.

HUMANITIES ASSOCIATION RECEIVES GRANT FOR NEW BRANCHES

Dr. J.C. Hammer, immediate Past President of the St. John’s Branch of the Humanities Association of Canada, has announced that two new branches of the association have been organized in Newfoundland.

The first was organized in Stephenville under the presidency of Mr. John Maddock, secretary of the Stephenville Teachers’ Association. The other was established in Corner Brook under President Mr. Ewald Hajek, a Corner Brook teacher.

The Canada Council has awarded an $800 grant to the three Newfoundland branches to bring speakers from other parts of Canada.

Already, Memorial has provided four speakers, Dr. Hammer (German Department), Dr. Peter O’Brien (Biochemistry), Mr. David Jones (History) and Dr. T.R. Marcus (Biology), who have presented lectures on Newfoundland’s West Coast.

Dr. Hammer said that the opening address next fall will be given by Lord Taylor, President of Memorial. Eight other members of the faculty have agreed to present papers at Stephenville and Corner Brook during the 1970-71 season.

ASSOCIATION ELECTS OFFICERS

The St. John’s Branch of the Humanities Association of Canada held its annual election of officers recently. President is Dr. Pete O’Brien, a member of the Department of Biochemistry at Memorial.

Other members of the executive are Dr. J.C. Hammer, Department of German and Russian, Vice-President and Executive member; Dr. Vivian Renner, Department of Psychology, Secretary; Miss Helen Peters, Department of English, Treasurer; Miss Barbara Kelly, Department of German and Russian, publicity; Mr. James Prowse of St. Bonaventure’s Grammar School, and Mr. Lloyd Kelsey.

MUN REPRESENTED AT BOSTON CONFERENCE

Memorial University of Newfoundland was one of three Canadian universities represented at a Conference on Instructional Centres for Instruction Research and Development held in Boston, Massachusetts last week. The Conference was sponsored jointly by a commission on college physics and by the Educational Research Centre of the Massachusetts Institute of Technology.

The Conference brought together college and university faculty administrators who had been involved in the design and operation of institutional centres for research and development in undergraduate education. Participants at the Conference presented descriptions of the organization and activities of their education research centres. These presentations were followed by two days of work sessions designed to explore the variety of problems and opportunities presented by Instruction Research Centres. The sessions were also intended to provide a framework and guidelines for other institutions establishing centres for educational research.

Memorial University was asked to participate because one of the activities of the recently-formed Institute for Research in Human Abilities is the introduction and evaluation of new methods of instruction at the first-year university level. The Institute was represented by its Director, Dr. Arthur M. Sullivan. Other Canadian universities invited to participate were McGill University and the Ontario Institute for Studies and Education.

Approximately 25 American universities have established Institutional Centres for Instructional Research and Development. These include the University of Michigan, Michigan State University, University of Berkeley, University of California at Berkeley, University of Maryland, Harvard University, University of Tennessee, Cornell University, Massachusetts Institute of Technology, University of Minnesota.
SUMMER FESTIVAL '70

The four-week Summer Festival '70 will open July 6 in the Arts and Culture Centre. Throughout the Festival audiences will be treated to plays, films, concerts and a variety of exhibitions.

What began as a 'Mini-Festival' at Memorial University in 1968 has now grown into 26 days of a variety of entertainment under the direction of Mr. John C. Perlin, Director of the Centre, and Mr. Michael Cook, Artistic Director of the Festival.

The Canada Council this year provided a grant which enabled the Centre to bring Miss Patricia Carroll Brown and Miss Margo Ford to direct two stage presentations A Scent of Flowers and The Beggar's Opera.

There will be six feature-length film presentations throughout the festival including Cat Ballou, The Guns of Navarone and Dr. Strangelove.

Lois Marshall, the distinguished Canadian-born soprano, will open the Festival with a Celebrity Concert. Other concerts will be presented by the St. John's Symphony Orchestra, organist Wayne Rogers, the John Lee Hooker Blues Band, Soma (an eight-piece Canadian band), and Don Cook's The Walking Happy and 'Rocks and Salt', an experiment in creativity based on Newfoundland folk songs.

Memorial continues to give support to the Festival in many ways, commercially, and with personnel. This year the C.S.U. has become directly involved by sponsoring a Blues and Rock Band Concert, and, in addition, subsidizing directly student admissions.

The three art galleries of the Centre, rented by Memorial, will also play a major role in the Festival. Curator Peter Bell has arranged for a number of local, national and international exhibitions to be shown here. These include "Paris Today - Light and Movement", Christopher Pratt, Duncan de Dergommeaux, Contemporary Print Exhibition, and an exhibition of several Newfoundland artists.

Civilization, the BBC series written and narrated by Lord Clark of Saltwood, will be presented in seven parts, each showing being 100 minutes in length and beginning at 11 a.m. This special presentation has been made available free of charge to the Summer Festival by General Foods Limited.

Two national C.B.C. Radio programmes will originate from the Arts and Culture Centre during part of the Festival. Gerussi, a popular morning programme hosted by Bruno Gerussi, and C.B.C. Metronome, a programme which covers the music scene across Canada with hosts Alan Millar and Harry Brown, will both present a unique look at Canada's tenth province.

All tickets are available at the Arts and Culture Centre Box Office. Tickets for all plays and concerts: $2.00 and $2.50; for John Lee Hooker concert $2.50 and $3.00; feature films $1.00; and Civilization series $0.50. Season tickets are $12.00 for seven performances, films excluded. Because of the student subsidy, there is a student rate, season ticket of $8.50.

See Coming Events column for the Festival schedule.

MARINE SCIENTIST ADVISES AUSTRALIAN GOVERNMENT

Associate Professor of Biology P.M.J. Woodhead has been asked to advise on a plague of starfish for the joint Commonwealth and Queensland governments in Australia.

Professor Woodhead went to Australia earlier this month to get a first-hand look at the situation.

Widespread public and scientific concern has arisen over the plagues of the large coral-eating starfish, Acanthaster planci, which are killing considerable areas of coral on the Great Barrier Reef. Heavy infestations of this starfish have extensively damaged other coral reef systems in the Pacific, most notably at Guam.

Prior to joining the Biology Department and the Marine Sciences Research Laboratory at Christmas, Professor Woodhead was Scientific Director of the Heron Island Research Station, situated on the Great Barrier Reef. An experienced SCUBA-diver, he has a wide knowledge of the Australian reef complex, as well as many other coral reefs in the Pacific.

MALTESE NUN STUDYING WITH EXTENSION SERVICE

A nun from the Mediterranean island of Malta has been travelling throughout Newfoundland since April studying community development with Memorial's Extension Service Film Unit.

Sister Gemma Cachia taught high school maths in her Island home until last year and was actively involved in a young christian workers movement which trained its members to be union organizers and representatives. It was through her work with these young people that she realized the importance of social communications and decided to leave teaching to study in the field.

Her studies have taken her from the University Catolica in Milan and St. Paul's University in Ottawa, to Memorial's Extension Service. She will shortly leave for Ottawa to continue her studies there and will wrap up with a six-week course at a College of Technology in Plymouth, England, before returning to her home in Malta later this year.

It is there that she plans to establish a religious community of men and women to dedicate their lives to the problems facing the young worker using as their tools the modern technology of television, film, and the press in both social communication and community development.
EASTPORT SUMMER FESTIVAL

This summer marks the first season of the Eastport Festival which features a visual arts programme and the opening of Newfoundland's first summer stock theatre.

The festival will be held throughout July and August in Eastport, Bonavista Bay, under funds provided by the ARDA Programme to the Eastport Committee for Progress. These funds are being administered by Memorial's Extension Service.

Handling the visual arts programme is Mr. Don Wright, Specialist in Art with the Extension Service. He will be holding classes throughout July, and possibly running into August, for the people of nearby communities and those who are vacationing in the Terra Nova National Park.

The visual art programme will include painting, drawing, print-making, a variety of crafts with emphasis on creative thinking and a wide choice of imaginative projects. There will be no formal lessons or organized classes, however, the students will work either individually or in groups with resident artists. Fees will range from $5 to $15 weekly.

Meanwhile, Mr. Richard "Dick" Buehler is Artistic Director of the Eastport Summer Festival. He is a member of the Folklore and English Departments on campus and is well known in theatre circles.

PERSONAL NOTICES

**Traveling Companion** — Leaving St. John's by car for Toronto on Saturday, August 1. Driving non-stop and interested in another driver. Contact Mr. Hull, Ext. 2427.

**For Sale:** Heathkit stereo amplifier AA21D IHF rating: 50 watt/channel +1 db 13 to 25,000 cps. Stereo AM–FM Tuner AJ43D AM range: 535 to 1620 kc. FM range: 88 to 108 mc. Call Ext. 2277.

**For Rent:** Four-bedroom, partially-furnished home with baseboard radiation throughout. Approximately 5 acres of land. House is located in Upper Gullies (approx. 19 miles from campus on Conception Bay Highway). Rental $150 per month. For further information contact Mrs. Vera Coates, Upper Gullies, Conception Bay — Telephone — Long Pond Exchange, 227-3240.

**Can Accommodate** two professors or graduate students (Sept. 1); prepared to give them breakfast and evening meal; house is located at 11 Byron Street; for further information contact Mrs. James Humphries, telephone 579-5746.

**Can Accommodate** one professor or graduate student (Sept. 1); prepared to give him breakfast and evening meal; house is located within easy walking distance of the University; for further information contact Mrs. A.H. Pierpoint, 159 Elizabeth Ave., telephone 726-5631.

**For Rent:** three-bedroom, fully-furnished house, furnishings including all electrical appliances. House is located on Mt. Scio Rd. and will rent for $200 per month; for further particulars contact Mr. A.E. Fekete, Mathematics Department, Ext. 2762.

**Wanted:** Three-bedroom, furnished house or summer cottage July 21 to August 21. Required for visiting doctor, wife and three children (boys 6 and 8 years, girl 3 years). Those with information may contact Mr. E.R. Scammell, Faculty of Medicine Ext. 2683.

**For Rent:** Two-bedroom, modern, fully-furnished apartment available for the summer months. Located on extensive private land near Murray's Pond, Portugal Cove Road. For further information call 895-6607.

MATHS COMPETITION WINNERS ANNOUNCED

John Read of St. John's has been awarded the $150.00 first prize in the Canadian Mathematical Congress 9th annual High School Competition to be held in Newfoundland.

The High School Mathematics Competition Committee with the cooperation of the Canadian Mathematical Congress, the Department of Mathematics at Memorial University and the Provincial Department of Education has announced the winner for the 1970 competition.

Second prize of $100.00 went to Katherine Huang of St. John's. The $50.00 third prize went to Christine Reynolds of Harbour Grace. The fourth through eighth prizes have a value of $25.00 each and have been awarded to Jerome Ryan (4th), St. John's; John Loder (5th), Gjoertown; Douglas Moffatt (6th), Grand Falls; Richard Walsh (7th), Stephenville; and Aloysius Hawkins (8th), Ferryland.

The special test was written on May 2 by 420 selected candidates from 78 schools in Newfoundland.
SELECTION OF CATERING CONTRACT FOR MEMORIAL UNIVERSITY FOR 1970 - 1971

The following is the text of a statement given by Lord Taylor at a press conference held June 10.

"The Contract with the C.N.I.B. for catering at Memorial University was fixed in May, 1969, for a period of one year. Under the contract, notice of termination had to be given 90 days before its expiry, and this was done. The C.N.I.B. was informed that new tenders would be called, and they were invited to tender. Tenders were, in due course, received from four catering organizations (including the C.N.I.B.).

"About two years ago, the President set up a University Food Committee, under the Chairman first of Dr. J.D. Eaton, and later Dr. S.J. Carew, the Master of Paton College. The other members of the Committee besides Dr. Carew and Dr. Eaton have been Professor T.C. Noel, Director of Planning and Works; Mr. W.H.M. Selby, the Comptroller; the President of the C.S.U.; the President of the Student Inter-Residence Committee of Paton College; a student representative of the affiliated Colleges; Mr. T. Careless, Administrative Assistant of Paton College, has acted as Secretary.

"The Committee is thus fully representative of the main aspects of University administration, and of the students as users of the service. It has to be remembered that the catering services, although they received a subsidy from the University, in common with all university catering services, in the shape of premises, heating and lighting, and heavy cleaning, are paid for by the students themselves.

"Each organization sent its representatives to the University and meetings were held with each by members of the Food Committee. Every advice was made available by the Comptroller and his staff to enable bidders to submit comparable tenders. The bidders were given until March 31, 1970, to submit their proposals. The Committee considered these proposals most carefully. The most favourable tender in terms of finance and attractiveness of service was that submitted by Versa Food Services Limited. Nevertheless, that of the C.N.I.B. was a close tender and, in view of the C.N.I.B.'s long association with the University, it was given the most careful examination. However, it was the unanimous decision of the Committee that the proposal from Versa Food Services should be accepted. In making their decision, the Committee had regard, not only to the past record of the C.N.I.B., but to the charitable nature of their activities. It was their conclusion, nevertheless, that, tenders having been invited, and the C.N.I.B. having agreed to tender, it must be primarily treated as a commercial organization engaged in a commercial enterprise. The Committee recommended the acceptance of the Versa Foods proposal.

"On April 24, at the request of the C.N.I.B., the President met with C.N.I.B. officials and received a detailed presentation from them as to why they felt that the C.N.I.B.'s tender should be accepted.

"The points raised by the C.N.I.B. were recorded in detail and placed before the University Food Committee on Wednesday, April 29. The Committee paid careful regard to the many points raised by the C.N.I.B. but, having regard to the need to provide an imaginative food service with maximum quantities for those who wished to receive such quantities at the lowest possible cost to the students, the Committee were still unanimous in their decision that it was right to accept the tender submitted by Versa Foods and they advised the President accordingly. They were, however, concerned that the good service given by the staff of the C.N.I.B., particularly the three senior ladies, be recognized and they hoped that Versa Foods would consider the possibility of rehiring them and other catering workers, particularly the seven blind or partially-sighted people, at present employed, and any others with long tenure.

"The Committee emphasized that it would be wrong to consider varying the terms of the contract after bids had been received. It was also emphasized that by entering into a commercial operation, and by tendering, the C.N.I.B. had to be regarded and dealt with as any other commercial operation, on terms neither more nor less favourable than those accorded to commercial contractors. It is fair to note that this view is shared by the C.N.I.B. Committee.

"At a meeting on April 30, the views of the University Food Committee were placed before the Chairman and Vice-Chairman of the Board of Regents, and the detailed submissions were also considered. The University Finance Committee met on May 6, and received the submission of the University Food Committee, together with a report of all the earlier meetings. The Finance Committee made a unanimous recommendation to the Board of Regents. The Board of Regents met on May 14, having before it the reports of the Finance Committee and the University Food Committee, together with the recorded observations made by the representatives of C.N.I.B.

"The Board of Regents have asked the Council of the Students' Union to hold a plebiscite next February among the students to determine the feelings of the students about the new service."
21st Convocation

Excerpts from the President's Speech to Convocation May 22, 1970.

"In these two May Convocations, we are welcoming 776 new graduates and five honorary graduates to our University community. Last September, in addition, 110 degrees were conferred. Thus, the total number of graduates within the year is higher than ever before."

"This year, the pattern of those graduating has changed. The number of first class degrees has risen from 28 last year, to 42. By contrast, the number of third class degrees has fallen from 331 to 268. Academic standards at Memorial are as tough as anywhere in Canada, so you will realize how significant these changes are.

"It has taken nearly twenty-one years for the University to reach a stage where we were satisfied that we should be conferring Ph.D. degrees. At this Convocation, for the first time, two of our graduates become Doctors of Philosophy. One an English scholar, Mrs. Leona Deorksen; the other a biologist, Miss Helen Bradbury. It is singularly appropriate that our first two Ph.D.'s should be in these disciplines, for it is in English that Memorial has made its name throughout North America, and it is in Biology that we have perhaps our greatest field of opportunity."

"Graduation marks the beginning of your career in life. And it may not even do that. For I suspect that many of you are not yet certain what career you want to follow."

"Do not be in too much of a hurry to decide on your final career. At this stage of life, all experience is good.

"However clever you are, your success or failure will depend on one thing above all else. Hard work. There is no escape. By using your brains you can find better and easier ways to do things. But unless you work and keep on working, and slogging away, you simply will not succeed.

"And incidentally, unless you work hard, you will not, in my experience, achieve happiness."

"I am pleased to say that the Provincial Budget includes the necessary sums for planning these vital capital projects and for some site work. But until it is passed, we cannot start.

"From then on, we should be building steadily at a volume of the order of $14 m. per annum for the next ten years. Only if we do this can we hold our own in the Canadian picture. For, as you know, great though the achievement of the past twenty years has been, we lag far behind every other province in Canada in opportunities for University education.

"Quite frankly, the Province cannot do this job on its own. That is why we have submitted to our Provincial Government a carefully documented plan for the consideration of the Federal Department of Regional Economic Expansion. We have asked for, and we need, $73.9 million over the next five years. By then, we should have nearly 10,000 students. And this assumes a lower growth rate than in the past - of 10% per annum instead of nearly 20% per annum. I am sure this assumption is wrong. But this is as much as we can achieve practicably.

"I am sometimes asked whether the Province can afford to support a University of the size we need."

"This is really a nonsense question. For this Province cannot afford not to have such a University."

"If you want Newfoundland to move backwards again, the recipe is easy. Cut spending on this University.

"But if you want to increase present prosperity and lay the foundations of future prosperity, here is the place to do it. The people of Newfoundland have been fortunate in that the Government of Newfoundland has seen what has had to be done, and has done its duty by Memorial. This needed courage - perhaps greater courage even than is needed now. But today there is no place for faint hearts.

"We are ready and rearing to go.

"Canada is ready to help us on our way.

"One courageous shove - and we shall move into action - to the benefit of this whole Island and Province."

Excerpts from the President's Speech to Convocation May 23, 1970.

"A university is ultimately to be judged not by its buildings, important though these are; nor by the learning of its professors, essential though these may be; nor yet by the size of its endowments. It is to be judged by the quality of its graduates. You who are graduating today are the measure of our success or failure. Your true quality will only become apparent over the years ahead, and this in turn will be shown by your achievements, whether in Newfoundland or in the rest of Canada, or elsewhere. You will be known by your fruits, and we shall be known by them too."

Continued Page Thirteen
Excerpts from the Address to Convocation May 22 by Dr. C.B. Macpherson, Professor of Political Science, University of Toronto.

"The University as Multiple Fool"

"There is no doubt of the fact -- it is a matter of simple observation -- that North American society does expect the university to do something for it. Governments -- in our case primarily provincial governments -- acting in the name of the taxpayers, are highly conscious of how much they spend on universities, and, as the bill goes up and up, they are sometimes perplexed as to whether the society they represent is getting its money's worth. That is rather a coarse way of looking at so fragile and artistic a thing as higher education, but given our market-minded civilization it is perfectly natural, and quite right. Society should be getting its money's worth. But we in the university must be coarse about it too, or at least we must be blunt about it.

"We must say bluntly that society, and the governments which represent society, are not getting, and cannot get, their money's worth as long as they ask for and expect the wrong product, and that in large measure they are asking for the wrong product."

"The university can still do the things it has always done, but if it makes this its main or its only task its resources are being not only underused but wrongly used. And if society asks it to do this, society is not going to get its money's worth. What a sick society needs most is diagnosis, at every level of its malfunctioning: ecological, physiological, economic, psychological, political, and above all (or below all), to use an old-fashioned word in little repute these days, moral. It needs diagnosis not just of what has gone wrong with its mechanism, but what has gone wrong with its values."

And less danger than academics may think, for most of us are apt to delude ourselves into thinking that we are indispensable to the ongoing work and power of a society."

"I referred a while ago to mediaeval society and its comparative moral stability. I think it is fair to say that its comparatively healthy moral tone may be attributed in part to an institution which most mediaeval political and ecclesiastical communities maintained, and which we might think of adapting to our needs. I refer to the institution of the court jester or fool. The last royal fool in England is thought to have been the one kept by Charles I, but the Earl of Suffolk had one as late as the 18th century. And Archbishop Laud was thought rather mean -- unprincely, even un-English -- for dismissing his fool on the grounds that he had been too outspoken. Laud's fellow princes had some reason to feel that the archbishop had let down the standard. For the function of the fool was precisely to be outspoken: to cut through the adulation with which the prince was surrounded, and speak the truth to him about anything or everything in his court -- to keep him in touch with the reality beneath the illusions sedulously fostered by the court."

"I suggest that the sovereign people stands in as much need of a jester or fool as ever a sovereign prince did, and to perform the same function -- to tell the truth, even when it is immediately displeasing."

"A sovereign people, being so numerous, cannot make do with a single jester. It needs a multiple one. And this multiple jester must be made an institution under the protection of the sovereign people. Where else can we find, in a modern society, such a multiple institutionalized jester but in the institution of the university?"
MUN COMMERCE STUDENT WORKING IN FRANCE

A second-year Commerce student at Memorial University is now in Dunkerque, France, as a participant in an international student exchange scheme conducted by L’Association Internationale des Etudiants en Sciences Economique et Commerciale (AIESEC).

Mr. Paul H. Shelley is working with the Port Authority in Dunkerque from June 15 to August 15. He is the son of Mr. and Mrs. Charles I. Shelley of St. John’s. Mr. Shelley is a Co-ordinator with Memorial’s Faculty of Engineering.

Mr. Paul Shelley, Mr. John Makannah and Mr. Constantine Pasaris, as advisor, formed a working committee during the past academic year to look into the possibility of establishing a branch of the AIESEC on campus.

PRESENTS PAPERS AT LEARNED MEETINGS

Mrs. Lelia D. Strout, Lecturer in Spanish at Memorial, presented papers to two learned societies earlier this month at the University of Manitoba in Winnipeg.

The first paper was presented June 2 to the Canadian Association of Latin-American Students. The paper, “The Changing Social and Political Reality of Latin-America and the attitude of the Novelist: The Revolution of the Novel” was the only paper to be presented by a representative of the Atlantic Provinces.

Following that meeting, she presented a second paper to the Canadian Association of Hispanists June 4. This paper dealt also with the Latin-American writer and his novels.

Mrs. Strout is with the Department of Romance Languages and Literature.

EXTENSION ASST. DIRECTOR ELECTED CAAE PRESIDENT

Mr. George Lee, Assistant Director of MUN’s Extension Service, was elected President of the Canadian Association for Adult Education in Newfoundland and Labrador at its recent annual meeting.

Mr. Lee, who succeeded Mr. Donald Snowden, Director of Extension, as president, has been extensively involved in the forming of the new Human Relations training committee.

The CAAE committee has been set up to promote sensitivity and human relations training throughout the province through a three-pronged programme—through a human relations laboratory designed for general use, a research sub-committee to deal with other aspects of the human relations picture, and through a committee to develop specialized programming for professionals through the laboratory system.

NEWFOUNDLAND CENTRE RECEIVES SPECIAL GIFT

The Centre for Newfoundland Studies in the Henrietta Harvey Library recently received a generous gift from Mrs. A.M. Fraser, the widow of the former Provincial Archivist and one-time Head of the Political Science and Economics Department at Memorial.

The gift, five volumes from Mr. Fraser’s personal library, includes a typewritten copy of the unpublished manuscript of the Hon. Dr. J.R. Smallwood’s biography of Dr. William Carson, an important 19th Century Newfoundland figure.

The work constitutes a unique and valuable addition to the field of Newfoundlandiana.

SENATE ELECTIONS

The following members of the Faculty of Memorial University have been elected to the Senate, for a three-year term:

Dr. W.J. Gushue (Education)
Dr. D.G. Pitt (Humanities)
Dr. M.F. Hodder (Humanities)
Mr. J.M.C. Facey (Engineering)
Dr. D.H. Rendell (Sciences)
Dr. F.R. Smith (Sciences)
Dr. J.M. Tague (Sciences)
Mr. R.G. Hattenhauer (Social Sciences)
Mr. E.R. Williams (Junior Studies)

PRESENTS PAPER AT MEETING IN FRANCE

Mr. Gerald Thomas, Assistant Professor of French at Memorial and MUN’s first recipient of an M.A. in Folklore, presented a paper in France last month.

Mr. Thomas attended the XXVe Congres des Societes Savantes du Centre-Ouest held at Royan May 9 to 11. His paper was entitled “Le Conte de Mensonges: problemes de la definition d’un genre de la litterature orale”, and was presented in the Ethnology-Folklore Section of the Congress.
MAY SENATE ACTIONS

The Senate has approved in principle a programme leading to the Doctor of Philosophy degree in Ocean Engineering in the Faculty of Engineering and Applied Science. The Faculty has been authorized to initiate the programme in 1971.

Faculty Council Amendment

An amendment to the constitution of the Council of the Faculty of Arts and Science has been made. Senate approved the replacement of the present clause 8.3 with that of the following:

"8.3 Membership:
The Graduate Studies Committee shall consist of the Dean of Arts and Science (ex-officio), the Registrar (ex-officio), a Chairman, seven representatives of disciplines, three students and two members at large. The seven representatives of disciplines are to be chosen so that each represents one of the following: Physical Sciences, Life Sciences, Earth Sciences, Social Sciences, English, other languages, other humanities.
The three student members are to be chosen so that one represents Natural Sciences, one Social Sciences and one Humanities."

Academic Calendar

The Senate approved a motion that the Winter Carnival break in the second semester be replaced by suspension of classes for one week as a study week, and that in 1971 the study week begin on Monday, March 1, and lectures be resumed on Monday, March 8.

Senate Committee

It was reported that the following had been named to the Ad Hoc Committee on ex-officio membership of the Senate:
G.E. Panting (Chairman)
C. Passaris
D.H. Steele
O.K. Crocker

ELECTED FELLOW OF PHYSICS INSTITUTE

Dr. S.P. Reddy, Associate Professor of Physics at Memorial University of Newfoundland, has been elected a Fellow of the Institute of Physics in London, England. Election is based on recognized distinction in research in physics.

Professor Reddy received his B.Sc. (Honours), M.Sc. and D.Sc. degrees from Andhra University in India. Prior to coming to Memorial in 1963 he was a lecturer at Andhra and a post-doctoral research fellow at the University of Toronto. At Memorial he was promoted to associate professorship in 1968.

Dr. Reddy is the author or co-author of over 25 scientific publications in the field of experimental molecular spectroscopy, one of the strongest areas of research in Canadian physics. His current interests lie in the fields of pressure-induced infrared absorption, electronic spectra of simple molecules in emission, far infrared Fourier transform spectroscopy and Raman spectroscopy.

Professor Reddy's research is currently supported by an $18,000 major equipment grant from the National Research Council and by the University.

H.H. Jackson

The Committee reported back to Senate. Senate approved that the five non-statutory ex-officio positions be filled during the 1970-71 academic year by the following:
Dean of Junior Studies
Dean of Student Affairs
Director of Extension Service
Representative of Affiliated Institutions
Representative of the Residential Colleges chosen by the Principal of Coughlan College, the Proctor of St. John's College and the Master of Paton College.

It was approved that when a Dean of Sciences takes up active duties the representative of the Residential Colleges relinquish his seat on Senate.

Senate Procedures Committee

An Ad Hoc Committee on Senate Procedures has been formed and charged "to review Senate procedures with particular reference to business which falls within the jurisdiction of Faculty Councils.

Membership:
Dean Harris (Chairman)
A.R. Stein
Miss H. Pritchett
J. Percy
J.B. Drinkwater
Dean Hickman (or his delegate)
Dean Bruneau (or his delegate)
Dean Rusted (or his delegate)
W. Bishop

Academic Planning

The Senate has asked the Academic Planning Committee to study the desirable curriculum and any other matter related thereto for a College of the University which may be established off the Avalon Peninsula. The Faculty Council of Arts and Science, the Faculty Council of Education, and the Council of Physical Education have been asked to establish similar committees for this purpose — to make recommendations to the Senate Academic Planning Committee.
NEW FACILITIES INSTALLED AS DEMANDS FOR LAB SPACE INCREASE AT MSRL

Five new laboratory cubicles have been erected in the basement of the Marine Sciences Research Laboratory as a result of increasing demands on existing working space.

Dr. F.A. Aldrich, MSRL director, said each cubicle is a completely self-contained lab having 110 and 220-volt electrical service, compressed air, gas and freshwater lines as well as link with the continuously-running salt-water supply pumped from the depths of Logy Bay. The new lab units will be used by this summer's contingent of visiting scientists as well as by student researchers.

Among the visiting scientists at the MSRL this summer will be:

Dr. Elmer Noble of the Department of Biological Sciences of the University of California at Santa Barbara. Dr. Noble will study parasites of deep-sea fish.

Dr. Chang-tai Shih, Canadian Oceanographic Identification Centre, Museum of Natural Sciences, Ottawa. Dr. Shih will be studying zooplankton of Newfoundland coastal waters.

Dr. J.S. Bleakney, Professor of Biology, Acadia University, whose area of investigation is the shell-less molluscs (nudibranchs) in Newfoundland waters.

Drs. K.W. Peterson, Zoology Museum, University of Copenhagen, Denmark, will study hydroids in their continuing investigation which is directed at revising the classic work by Fraser on North American hydroids.

Dr. Katharina Mangold, Laboratoire Arago, Banyuls-sur-Mer, France, will continue her work on squid later in the summer. Dr. Mangold is a Research Professor at the MSRL.

Other scientists visiting include: Miss Susan Hoffer of McGill's Marine Science Centre, Dr. R.B. Holliman, Dr. Ian Rusted (left), Dean of Medicine, and Mrs. June Huntley, Consultant-in-Residence, accepted the 12-volume set of the Canadian Heart Foundation publication on behalf of the Medical School Library. Presenting the volumes was Mr. Andy Rose, President, Mr. Urban Noel, Executive Secretary, and Mr. Tom Freeman, Director, all of the Foundation's Newfoundland Division.

DEAN EMERITUS PUBLISHES GLOSSARY OF NFLD. WORDS

Dr. A.C. Hunter, Dean Emeritus of the University, has recently published a study entitled, "Glossary of Unfamiliar and Other Interesting Words in the Newfoundland Journal of Aaron Thomas".

The publication is in typed form and was reproduced by the University's Duplicating Centre. It is not on sale but, within the limits of a small printing, copies may be obtained by interested persons by writing the author at his home, 45 Long Pond Road, St. John's.

Department of Biology, Virginia Polytechnic Institute, and Dr. Michael Berrill of the Department of Biology, Trent University.

MEDICAL LIBRARY RECEIVES HEART FOUNDATION GIFT

The Library of Memorial University's School of Medicine was presented with the 12-volume set of Modern Concepts of Cardiovascular Disease by the Newfoundland Division of the Canadian Heart Foundation.

Dr. J.B. Littlefield, Professor of Surgery; Dr. Phyllis Ingram, Assistant Professor of Surgery, and Dr. W.H. Marshall, Director of Postgraduate Medical Education.
HONORARY APPOINTMENT FOR UNDERSEA EXPLORER

A pioneer in underwater exploration has been made an Honorary Research Associate of the Marine Sciences Research Laboratory by the Board of Regents of Memorial University.

Dr. Joseph B. MacInnis, 32, visited the MUN campus early this year to speak with Engineering, Biology and Medical students about the numerous underwater projects with which he is associated.

Dr. MacInnis received his M.D. from the University of Toronto and is today one of the world's foremost underwater scientists. In 1964 he was life support physician for phase two of the Man-In-Sea project; a dive to below 400 feet which lasted 49 hours, and in 1965 he directed over 75 experimental dives for Ocean Systems Inc. He has been the medical director for Ocean Systems for the past four years.

The U.S. Navy certified Dr. MacInnis as a Man-In-Sea aquanaut for its Sealab III programme, for which he was also consultant. In 1967 he was the scientific director of the deepest and longest dive ever made by man. Two divers lived and worked at 615 feet for 53.5 hours beneath the Gulf of Mexico.

GEOLeGIST ATTENDS CONFERENCE IN MOROCCO

Charles J. Hughes returned on May 28th from a second visit to Morocco, where he had been invited to participate in an international colloquium involving an 18-day field excursion followed by a 3-day conference upon the Precambrian rocks of the Anti-Atlas Mountains.

A point of interest in the proceedings was the resemblance of these late Precambrian volcanic and sedimentary rocks to rocks of similar age occurring both on the Avalon Peninsula and the Grand Banks of Newfoundland. Those on the Banks had previously been reconnoitered in diving expeditions by the late Hugh Lilly, M.U.N. Geology Professor.

The resemblances suggest that Avalon once lay in close proximity to Morocco before the old and new worlds were separated by "continental drift" and that Avalon together with the Banks once formed part of the mainland and continental margin of a former Africa continent. This conclusion is in line with current ideas on "new global tectonics", a philosophy that promises to revolutionise earth sciences.

APICS EXECUTIVE MEETS ON CAMPUS

The Executive of the Atlantic Provinces Inter-University Committee on the Sciences (APICS) met on campus June 19.

Dr. S. Breckon, Professor and Head of the Department of Physics at Memorial, said that Memorial had invited the executive to meet here. It was the first time the executive have met in Newfoundland.

Dr. Breckon said that most of the business concerned items raised at the Central Committee meeting in early May and at the Fifth Science Planning Seminar held at the Nova Scotia Agricultural College in Truro May 19 and 20.

Other members of the executive are: Dr. J.J. MacDonald, Dean of Science, St. Francis Xavier University, Chairman; Dr. G.F.O. Langstrath, Dean of Graduate Studies, Dalhousie University, Secretary; Dr. C.F. Poole, Dean of Arts and Science, Mount Allison University, member; Dr. C. Cheverie, University of Prince Edward Island, Treasurer; Dr. V. Ross, Dean of Science, Universite de Moncton, member; and Mr. W.L. Barteaux, Coordinator of APICS.

PSYCHOLOGIST RECEIVES CANADA COUNCIL GRANT

Dr. Graham Skanes, Associate Professor of Psychology and Deputy Director of the Institute for Research in Human Abilities at Memorial, has been awarded a $10,900 grant by the Canada Council.

The grant was awarded for Dr. Skanes' research project "Ability changes in children moving from small isolated communities."

Dr. Skanes notes that because of the relocation programme being carried out with citizens in the rural parts of Newfoundland there is a unique opportunity here to investigate the effects of these changes on abilities.

In 1969, for the purpose of establishing base lines, tests were administered to children who had not yet been relocated. The grant will allow follow-up investigations to be done with the children after they have been moved.

NURSES PRESENT CAMPUS WITH SECOND MAPLE TREE

The second graduating class of Memorial's School of Nursing has presented the University with its second Norwegian Maple.

Miss Susanne Mercer made the presentation to Lord Taylor on behalf of the class. The eight graduating students, Miss Joyce Nevitt, Director of the School, and Lord Taylor all participated in the ceremony May 23.

Earlier in the week, Lady Taylor presented the grads with their School of Nursing pins in a ceremony held in the Junior Common Room, Dining Hall.

While this was the second group of students to graduate from Memorial's Nursing School, they hold the distinction of being the first class to have completed the full five-year undergraduate course.
RELATIONS BETWEEN UNIVERSITIES, GOVERNMENTS REPORT PUBLISHED

A press conference will be held June 30 in Ottawa to announce publication of the report of the Study of Relations between Universities and Governments. The report, entitled The University, Society and Government, is being published in French and English by the University of Ottawa Press at $3.75 each.

The authors are Donald C. Rowat, Professor of Political Science, Carleton University, and Rene Hurtubise, formerly Associate Professor in the Faculty of Law, University of Montreal, and now Vice-Rector at the Montreal Campus of the University of Quebec.

The report analyses and makes recommendations on university-provincial relations, the role of the federal government and the support of university research and interprovincial coordination. Two volumes of research studies are being published at the same time as the report, at $5.00 each.

The study was sponsored by the Canadian Association of University Teachers, the Association of Universities and Colleges of Canada, the Canadian Union of Students and L'Union generale des etudiants du Quebec. It was financed by a $150,000 Ford Foundation grant.

CLASSES IN JUDO

The MUN Judo Club proposes to start classes in judo for children of faculty and staff in September.

The club asks that interested persons forward their names and those of their children (six years and over) to Mr. Stephen J. Walsh, Secretary-Treasurer of the Club, S-236 or S-117. The deadline is July 10th.

The club's instructor is Mr. Y.M. LeGal of the Faculty of Medicine. He holds a 3rd. degree Blackbelt.

For further information call Mr. Walsh at 579-0625 between 6:15 p.m. and 7:15 p.m.

PICKERSGILL FELLOWSHIP AVAILABLE FOR GRADUATES

The J.W. Pickersgill Fellowship was established by Act of the Provincial Legislature dated March 28, 1969.

The Fellowship, valued at $4,000 per annum, is available to graduates of Memorial University who are engaged in studies leading to the degree of Doctor of Philosophy in History or Political Science.

The regulations for the award of the Fellowship are as follows:

A. GENERAL

1. Applications for the fellowship, which is awarded annually, shall be received by the Chairman of the Selection Committee, i.e. The Dean of Arts and Science, not later than February 15.

2. Announcement of the successful applicant(s) shall be made not later than March 31.

B. METHOD OF MAKING APPLICATION FOR THE COMPETITION

3. In order to be deemed eligible for the competition, applicants must supply the following information to the Selection Committee:

(a) Official B.A. transcript;
(b) Official M.A. transcript;
(c) Three letters of reference, at least two of which constitute academic appraisals of the applicant's performance during his B.A. and M.A. degree programmes;
(d) Applicants who have not formally completed their M.A. degree programmes by February 15, but who succeed in completing all such requirements in time for the regular Spring Convocation, must supply complete official M.A. transcripts not later than May 15;
(e) Formal application form, prepared by the Selection Committee, which will elicit the following information:
   1. Name of applicant;
   2. mailing address (temporary);
   3. mailing address (permanent);
   4. year of birth;
   5. citizenship status;
   6. marital status and dependents, if any;
   7. list of publications;
   8. list of university awards, with amounts received;
   9. alternative pre-doctoral awards for which the applicant intends to compete;
   10. name of university, institute, school or centre at which applicant intends to pursue doctoral study.

(f) formal letter or other appropriate form authenticating admission to university, institute, school or centre for the purpose of undertaking a doctoral degree programme.

4. Where the applicant is a former recipient of an annual fellowship award, he must 1) arrange to have his principal doctoral supervisor supply the Selection Committee with an appraisal as regards his ability to continue with doctoral study and 2) write a letter to the Selection Committee outlining progress during the preceding year and indicating his study intentions for the next year. In addition, he must supply the Selection Committee with all formal transcripts or documents relating to courses (programmes) completed or in process.

5. The successful applicant(s) will receive $4,000 annually to be paid in two instalments of $2,000 each, in the months of September and February respectively. Before the second instalment is authorized by the Selection Committee, the successful applicant(s) must arrange to have his doctoral supervisor, or some other appropriate university official, confirm that in fact he has been either in residence for the appropriate period or engaged in external research activity under supervision, and has been effectively pursuing doctoral studies.

C. MISCELLANEOUS

6. The Selection Committee will advertise the Annual J.W. Pickersgill
Fellowship as it deems appropriate.

7. The Selection Committee, when it is deemed appropriate, may arrange to have applicants come before it for the purpose of being interviewed.

MAY APPOINTMENTS

Twenty-two people were appointed to the Administrative Staff and one to the Faculty of Memorial University.

The following is the list of new staff members as provided by the Personnel Department:

Miss Joan E. Taylor, Clerk, Education Library; Miss Shirley M. Roberts, Clerk, University Library; Miss Kathryn M. Wakeham, Stenographer, Extension Service; Mr. Glenn W. Collins, Asst. Registrar, Registrar’s Office; Mrs. Veronica Bachynsky, Clerk, Controller’s Office; Mrs. Peggy H. Sturge, Clerk, University Library; Mrs. Rosanne P. Delaney, Library Asst., University Library; Mrs. Mary Haardeng-Padersen, Clerk, Student Affairs (Bookstore); Mrs. Mary M. Lawlor, Secretary, Inst. for Research in Human Abilities; Miss Bernice L. Churchill, Clerk (Cashier), Student Affairs (Bookstore); Mr. W. Clifford Cantwell, Clerk, Biology; Mr. E. Lloyd Noel, Senior Technician, Ed. Television; Mr. James V. Andrews, Fitter/Welder, Technical Services; Miss Geraldine L. Kennedy, Library Asst., University Library; Mr. Arthur J. Robertson, Asst. Registrar, Registrar’s Office; Miss Martha M. Nugent, Clerk, Physics; Miss Sheila M. P. Lynch, Research Asst., English; Miss Joanne L. Myrick, Admissions Officer, Registrar’s Office; Miss Alva M. Norman, Stenographer, Admin. Services; Mrs. Freda Wright, Secretary, Medicine; Mr. Roy A. Bonnell, Credit Manager, Controller’s Office; and, Miss Mary E. Maynard, Clerk, University Library.

Dr. Cecil J. Hodson has been appointed Professor and Chairman of Radiology, Faculty of Medicine.

COMING EVENTS (Cont’d)

Wednesday, July 22nd
Local Celebrity Concert featuring St. John’s Symphony Orchestra Brass Quartet:
St. John’s Symphony Orchestra String Quartet:
Under the direction of Ian Mennie
and “Rocks and Salt” an experiment in creativity based on Newfoundland folk songs devised by Donald Cook.

Thursday, July 23rd
Film: Dr. Strangelove, starring Peter Sellers.

Friday, July 24th
Film Series “Civilization” 11:00 a.m.
“The Beggar’s Opera” – John Gay.

Saturday, July 25th

Sunday, July 26th
Exhibitions in the Art Galleries.

Monday, July 27th
Special presentation by the St. John’s Folk Arts Council – Newfoundland Night Ballada – Songs – Instrumentalists – Dances . . . .

Tuesday, July 28th
Film: Casino Royale, starring Ursula Andress, David Niven.

Wednesday, July 29th
Film Series “Civilization” 11:00 a.m.
Film: Only Two Can Play, starring Mai Zetterling, Peter Sellers.

Friday, July 31st
Special Presentation by the St. John’s Folk Arts Council INTERNATIONAL FOLK CONCERT (See brochure)

Saturday, August 1st
INTERNATIONAL FOLK CONCERT

All events at 8:30 p.m. unless otherwise stated.

JULY BLOOD CLINIC

The Canadian Red Cross Blood Transfusion Service will be holding a blood donor clinic July 14 and 15 in the Physical Education Building, Room G127. The hours of the clinic will be from 9:30 a.m. to 12:30 p.m. and 2 p.m. to 4:30 p.m. each day. A quota of 400 donors has been set for the two days.

The Canadian Red Cross Blood Transfusion Service asks for a special effort by as many as possible to attend this clinic.

PERSONAL NOTICES

A furnished two or three bedroom house or a furnished two or three bedroom apartment is required for four months, approximately from September 1 to December 31, 1970, by a Commonwealth Fellow who will be associated with the Geology Department. He will be accompanied by his wife and two children, a boy of 4 and a girl of 8.

If anyone has helpful information or suggestions, please phone the Geology Department, Ext. 2540 or 2476.
