The development of our North Campus is about to get underway. Although some preliminary work had begun last fall, the first real announcement was made in Ottawa July 6 by the Minister of National Health and Welfare. He announced that Ottawa had approved in principle the province's application for almost $30-millions to be used towards the construction of a general hospital and health sciences centre on the North Campus.

The Provincial Minister of Public Works, the Hon. J.R. Chalker, made a public statement July 20 in which he announced the appointments of the project managers to co-ordinate the development of the building programme on the North Campus, and the architect for the new general hospital health sciences centre.

To give our readers a better appreciation of both important announcements, the M.U.N. Gazette has published letters concerning the Federal grant from the Hon. Edward Roberts, Provincial Minister of Health, and the Hon. John Munro, Minister of National Health and Welfare. Also printed is a letter to Mr. Roberts from Dr. Gordon A. Winter, Chairman of the Board of Regents, in which he outlines the importance of the grant to our University and province. (See pages 2 to 4.)

The complete text of Mr. Chalker's public statement has also been printed on pages 4 and 5.
July 6, 1971

My dear Lord Taylor:

It has taken an exquisitely long time, but the Government of Canada have finally given us the official commitment with respect to the Health Resources Fund money for the new Hospital and the Medical School Project. I enclose a copy of the letter sent to me by the Honourable Mr. Munro in which he sets forth this commitment.

May I thank you and your associates for the help you have given my colleagues and me in our efforts to make the Project a reality.

Sincerely yours,
Edward Roberts
Minister of Health,
Government of Newfoundland and Labrador.

July 6, 1971

Dear Mr. Roberts:

I would like to acknowledge receipt of your letter of June 10 relating to the support of the Health Sciences Centre, Memorial University of Newfoundland through the Health Resources Fund. May I, at this time, congratulate you and your colleagues on the plans you are making for what should be a very fine Health Sciences Centre.

I am most pleased to approve in principle a total contribution of up to $10 million from the $75 million portion of the Health Resources Fund towards the costs of this Centre in recognition of it being a project of national significance. This contribution would be in addition to a contribution of up to $10½ million from the Atlantic portion of the Fund and, of course, the contributions from your per capita allocation. The total of these contributions will amount to approximately $30 million or 75% of the actual cost, taking into account the $1.99 million I have already approved in contributions towards the costs of Functional Planning, Temporary Buildings, Library and Design. A statement of the allocations and commitments to 21 June 1971 excluding reference to the $75 million portion of the Fund is attached.

Any contributions from the per capita portion or the $75 million portion must, under the legislation (Section 4) be limited to 50% of the costs of construction. You may apply, however, contributions from the $25 million portion of the Fund to the remaining 50%. My approval of contributions to your hospital and medical school will, therefore, be based on the following formula:

A. 50% of cost charged
   (i) to remaining $400 million per capita portion ($8,304,348) until expended
   (ii) then to the $75 million portion up to a total of $10 million.
B. 25% of cost charged to remaining $25 million Atlantic portion ($9,836,325).
C. 25% of cost to be paid by Province of Newfoundland

This formula would result in the following maximum contributions:

<table>
<thead>
<tr>
<th>New contributions</th>
<th>A. (i)</th>
<th>$8,304,348</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>B. (ii)</td>
<td>10,000,000</td>
</tr>
<tr>
<td></td>
<td></td>
<td>9,152,174</td>
</tr>
<tr>
<td></td>
<td></td>
<td>27,456,522</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1,991,025</td>
</tr>
<tr>
<td>Total maximum HRF contribution</td>
<td>$29,447,547</td>
<td></td>
</tr>
</tbody>
</table>

There would be a credit of approximately $675,000 remaining in your $10% million share of the Atlantic portion. I suggest that the disposal of this balance be discussed in later years when actual costs are known.

If you or your officers see any inconsistencies or errors in these calculations, I would appreciate hearing from you. My officials would be most pleased to assist you with the preparation of project submissions on form HRF 6 for my approval of specific contributions.

Yours sincerely
John Munro
Minister of National Health and Welfare.

Total Possible Commitments                           $20,131,698
July 14, 1971.

My dear Minister:

Your letter to the President of the University of July 6th was laid before the Board of Regents at their meeting on July 8th. The Board was unanimous in asking me to write to you to convey their deep appreciation of the laudable work which you have undertaken, and which have now been crowned with success, in connection with the obtaining from the Federal Government the necessary finances to construct the new General Hospital as a main teaching and reference hospital for the whole Province on or immediately adjacent to the campus of Memorial University.

It is not too much to say that since the move to the new campus in 1961, this is perhaps the most important single step which has been taken in connection with the development of the University. That you should have obtained for the people of the Province and for the use of the University, a commitment from the Federal Government to provide $29.45 m., and that the Province should have undertaken to provide the balance of $10. m. is an indication of the wisdom of the decision which you and the Cabinet have taken to move the General Hospital to the new site adjoining the Medical School.

I am advised by the members of the Faculty of the Medical School that the result of this decision will not only place Memorial in the forefront of the teaching schools of medicine of Canada, but will also provide for the people of the whole Province a service which is greatly superior to that which has been available in the past. In saying this, I make no criticism whatsoever of the splendid efforts of generations of doctors and officers of the Department of Health who have served Newfoundland wisely and well. But in this age of specialization and increasing technical development of the science of medicine, it is imperative that the people as well as the medical students should be able to benefit from the very best which science has to offer. What you have achieved in the past few months has laid the foundation for these provisions.

I know that all along the Government has had faith in the University's capacity to develop a first class school of medicine. This crowning gesture is a further concrete example of this faith, and an indication that deeds will match words.

I should be grateful if you would convey the gratitude of the Board of Regents and indeed the whole University, to the Premier and the members of the Cabinet, as well as yourself. I would also ask you to be good enough to convey our gratitude to the Honourable John Munro and the Honourable Donald Jamieson for the parts which they have played in this great achievement.

Yours sincerely,
Gordon A. Winter
Chairman,
Board of Regents

The following is the public statement given by the Hon. J.R. Chalker, Minister of Public Works.

"In recognition of the unquestionable value of higher education both to our young people and to the future of our province, the Government of Newfoundland and Labrador have undertaken another large increase and improvement in the educational facilities at Memorial University. To this end, the Government, in collaboration with the University, are developing the north campus of the University.

"In addition to facilities intended for use by the University, a new general hospital will be located on the north campus. As my colleague, Hon. Edward Roberts Minister of Health, has stated publicly, this new hospital will serve two different and separate functions. It will serve to replace the existing General Hospital in St. John's as the basic referral hospital for the entire province and, as well, it will serve as the teaching hospital for medical students at the University. Construction of the General Hospital and the Health Sciences Centre, which will house the classrooms and laboratories for the School of Medicine, is estimated to cost $40,000,000 of which the Government of Canada have already committed nearly $30,000,000.

"In addition, located at the north campus will be the Life Sciences Centre, the School of Engineering and Applied Sciences, students' residences, a students' centre, a convocation hall, and a gymnasium.

"Today it gives me great pleasure indeed, to announce the appointment of Scrivener Projects Limited of Toronto as Project Managers to co-ordinate the development of the building programme on the North Campus of Memorial University. Mr. Harvey Self, President of Scrivener Projects Limited, is to be in charge of the building project. The task of his firm will be to co-ordinate all aspects of the development of the north campus.

"Working in close association with Scrivener Projects will be the St. John's firm, Project Management and Design Limited whose President is Mr. Bruce Parry.

"Moreover, I am pleased to announce, together with my colleague the Minister of Health, the Firm of John C. Parkin of Toronto as Architect for the new General Hospital and the Health Sciences Centre. Mr. Donald Wilson, the firm's senior partner in charge of hospitals, will be assigned to the project on a full time basis and will reside for the duration here in St. John's. This architectural firm has considerable experience in the hospital construction field including the General Hospital at Etobicoke, Ontario, the North Western General Hospital, Toronto, North Bay Civic Hospital, North Bay, Clarke Institute of Psychiatry, Toronto, Humber Memorial Hospital, Toronto, the Donwood Foundation Hospital and Rehabilitation Centre, Toronto, the Ottawa General Hospital, the Greater Niagara General Hospital, Niagara Falls. In addition, the firm were architects for the $125,000,000 Toronto Dominion Centre in Toronto, the $100,000,000 Downtown Redevelopment in Ottawa and the $42,000,000 Toronto International Airport, among..."
Dr. G.A. Frecker appointed Chancellor

The appointment of Dr. G.A. Frecker as Chancellor of Memorial University, in succession to Lord Thomson of Fleet, who retired in May, 1968, was announced on July 26.

Commenting on Memorial’s new Chancellor, Lord Taylor, President of the University said, “It is indeed fitting that the first Newfoundlander to occupy the position of Chancellor of this University should be our old friend and colleague, Dr. Alain Frecker. Dr. Frecker was Head of the Engineering Department here, and subsequently became a member of both the Board of Governors of Memorial University College, and the Board of Regents of the University. He has served on the Senate, and has been Deputy Minister and Minister of Education. He has always been a good friend to the University.

“It is a double pleasure to us that in welcoming Dr. Frecker in his new capacity, we also welcome Mrs. Frecker, a valued member of our faculty, as wife of the Chancellor. The Frecker family have many other links with the University, and it is no surprise that the appointment of Dr. Frecker is a welcome one to us all.”

The Chancellor of the University is appointed by the Lieutenant Governor in Council, and is Chairman of Convocation. He is responsible for the conferring of degrees. In the absence of the Chancellor, his functions are performed by the President in his capacity as Vice-Chancellor.
Dr. J.C. Dittmer has been appointed Professor of Biochemistry. A native of Oklahoma, he obtained a B.S. in Chemistry at the University of Oklahoma and he went on to the University of Washington to take a Ph.D. in biochemistry in 1958. He taught there from 1954-55 and then became a Research Assistant and Fellow till 1958. This was followed by a Post-doctoral Fellowship with the U.S. National Institute of Health with Dr. R.M.C. Dawson, and with the Agricultural Research Council Institute of Animal Physiology, Cambridge, England.

In 1960, Dr. Dittmer was appointed Assistant Professor of Biochemistry at the University of Southern California, with a similar post in 1962 at the University of Kentucky till 1965 when he became Associate Professor of Biochemistry there. He joined the University of St. Louis in a similar post in 1965, being appointed full Professor there in 1968 until joining Memorial University of Newfoundland, Faculty of Medicine, in January 1971.

He is a member of several Biological and Chemical Societies and has published numerous papers during the years from 1957-70. His research interests are in the Chemistry and Metabolism of Lipids.

Dr. George Fodor, who arrived in May to take up his appointment as Associate Professor in Clinical Epidemiology, was born in Czechoslovakia. He received his M.D. from Charles University, Prague, followed by the equivalent of Ph.D. for his research in Cardiovascular diseases in the Prague Institute for Cardiovascular Research. He was a member of the Epidemiological Research Group there and in 1966 became the Chief of this Group.

Since 1968, Dr. Fodor has been the Senior Research Worker with the First Medical Clinic, University of Goteborg, Sweden, engaged primarily on epidemiologic aspects of cardiovascular diseases. He has taken part in co-operative studies with the University of Edinburgh with Dr. Michael Oliver on a large scale primary prevention trial of individuals with ischemic heart disease, and in another co-operative study which has been taking place since 1964 between the University of Goteborg and the Prague Institute for Cardiovascular Research.

Dr. David Severs, Chief Medical Health Officer, Department of Health, St. John's since 1964, and Dr. D.A. Shedden, the Medical Consultant to the Hospital Insurance Division, Department of Health, have been appointed Honorary Lecturers in Epidemiology and Biostatistics. Dr. Severs was born and educated in England, and after taking his medical degree at Oxford served in various posts at the Belgrave Hospital for Children and the Poplar Hospital in London before coming to the General Hospital, St. John's. Dr. Shedden obtained his medical degree and the D.P.H. from Edinburgh University and entered General Practice in St. John's after serving his internship at the General Hospital. He is active on Public Health Committees and served as President of the Newfoundland-Labrador Branch of the Canadian Public Health Association in 1969-70.

Dr. F.R.H. Wrigley, Assistant Professor of Anaesthesia at McGill University, has been appointed Associate Professor of Anaesthesia at Memorial University. He was born in England, and after obtaining his medical degree from Guy's Hospital Medical School, University of London, served in various hospital appointments followed by two years in the R.A.M.C. in Malaya. He holds the Diploma (Obstetrics) from the Royal College of Obstetricians and Gynaecologists, England; the Diploma in Anaesthetics from the Royal College of Surgeons, England and from McGill University, and in 1960 obtained the Fellowship in Anaesthesia from the Royal College of Physicians and Surgeons of Canada.

Dr. David Severs, Chief Medical Health Officer, Department of Health, St. John's since 1964, and Dr. D.A. Shedden, the Medical Consultant to the Hospital Insurance Division, Department of Health, have been appointed Honorary Lecturers in Epidemiology and Biostatistics. Dr. Severs was born and educated in England, and after taking his medical degree at Oxford served in various posts at the Belgrave Hospital for Children and the Poplar Hospital in London before coming to the General Hospital, St. John's. Dr. Shedden obtained his medical degree and the D.P.H. from Edinburgh University and entered General Practice in St. John's after serving his internship at the General Hospital. He is active on Public Health Committees and served as President of the Newfoundland-Labrador Branch of the Canadian Public Health Association in 1969-70.

Dr. F.R.H. Wrigley, Assistant Professor of Anaesthesia at McGill University, has been appointed Associate Professor of Anaesthesia at Memorial University. He was born in England, and after obtaining his medical degree from Guy's Hospital Medical School, University of London, served in various hospital appointments followed by two years in the R.A.M.C. in Malaya. He holds the Diploma (Obstetrics) from the Royal College of Obstetricians and Gynaecologists, England; the Diploma in Anaesthetics from the Royal College of Surgeons, England and from McGill University, and in 1960 obtained the Fellowship in Anaesthesia from the Royal College of Physicians and Surgeons of Canada.
Mr. R.A. Parsons, Q.C., a noted Newfoundland poet, has given several copies of each of his books of poetry to the University in tribute to the memory of the late Dr. A.C. Hunter, Dean Emeritus. Dr. Hunter wrote the foreword to the volumes entitled, "The Village and Wa yside" and "Interludes". Other volumes presented were "Sea Room" and "The Rote". Lord Taylor accepted the books on behalf of the University and, in doing so, he pointed out that the gift was a most appropriate one.

and B-Y Yap; and “Metal-Metal Compounds; Mo-Sb, Mn-Sb, Co-Sb, and Fe-Sn-Ni Systems” by E. Eisner, J. Filkin, M.J. Newlands and L.K. Thompson.

**Physics**

Members of the Physics Department who attended the annual meeting of the Canadian Association of Physicists at Carleton University, Ottawa, June 21 to 25 are: Professors C.W. Cho (who also served as chairman of the session on Laser Applications and Instrumentation), J.P. Hodych (who gave a paper on ‘The effect of uniaxial compression on the low-field magnetization of rock’), S.P. Reddy, D.H. Rendell, R.D. Murphy, A.J. Palmer (who presented a paper on ‘Stimulated light scattering and self-focussing in laser-produced plasmas’), P.D. Smith, R.H. Tipping (who gave a paper on ‘The dipole moment of HC1’) and Dr. G. Varghese, Research Associate.

Just prior to the Ottawa meeting Drs. Reddy, Tipping and Varghese, together with Mr. Alan Forbes (Honours B.Sc. graduate in Physics this spring), attended the 26th Symposium on Molecular Structure and Spectroscopy at Ohio State University, Columbus, Ohio, June 14-18. The following papers were presented there: ‘Repulsive potentials from continuous electronic absorption spectra’ (Forbes and Tipping), ‘Overlap parameters of the H2-He and H2-Ne pairs from the collision-induced infrared fundamental band of H2’ (Reddy and Chang), and ‘Frequency shifts of the rotational lines of the collision-induced fundamental band of H2’ (Varghese, Ghosh and Reddy). The co-authors K.S. Chang and S.N. Ghosh are M.Sc. candidates in Physics at Memorial.

Professor E.R. Deutsch, on sabbatical leave in the U.K., gave an invited lecture on ‘Palaeomagnetism of Lower Palaeozoic rocks of Bell Island, Newfoundland’ to the Department on Earth Science at the University of Leeds on May 12. Dr. Deutsch spent the first two weeks of July on a field trip in southeastern Ireland, collecting rocks for further palaeomagnetic studies on his return to Memorial next month.

Drs. Tipping and Clouter of the Molecular Physics group are also overseas this summer. Professor Tipping is spending the month of August at the Institute for Quantum Chemistry at the University of Uppsala, Sweden. While there he will give a lecture on ‘Dipole moments of diatomic molecules’. Professor Clouter is attending two meetings in France: the International Conference on Light Scattering in Solids, held at Paris July 19-23, and the International Conference on Phonons, held at Rennes July 26-28.

**Psychology**

Dr. Richard L. Taylor is one of three psychologists to receive a special equipment grant from the National Research Council of Canada this year. Since assuming his post as Assistant Professor in the Department of Psychology in September, Dr. Taylor has received commitments from Ottawa for $37,000.00 in support of his basic research program.

The aim of his program is to provide a solid data base which can be used to solve the puzzle of how animals and humans recognize, and are able to adapt to, familiar objects and visual environments. An early finding from this work at Memorial has been that lines of text, in which individual letters are presented either normally or as mirror images, are read faster from left-to-right with normal letters, but are read faster from right-to-left with mirror image letters. This may indicate that either the left or right hemispheres of the brain are dominant in reading visual input, depending on direction of scan and which part of the figures contain the most information. That would have broad implications both practically, in suggesting optimal ways of training children how to read, and theoretically, in contributing to our basic understanding of complex perceptual skills.

**Physics dept. given seismogram synthesizer**

The Physics Department has recently received the gift of a seismogram synthesizer from Amoco Canada Petroleum Company, Ltd.

The unit, which simulates recordings of ground movement due to the passage of seismic waves from earthquakes or explosions, is valued at $1,500, and will be used in the undergraduate geophysics teaching laboratory under the supervision of Dr. E.R. Deutsch.

The seismogram synthesizer is fully compatible with the analogue computer and seismic recording truck previously donated by Amoco (see M.U.N. Gazette, April 17, 1970, p. 2).
A portrait of the Rt. Hon. the Viscount Rothermere of Hemsted, first Chancellor of Memorial University of Newfoundland, was presented to the University on Tuesday, July 6th in the Board Room. Lord Taylor, President and Vice-Chancellor of M.U.N., accepted the portrait, which was presented on behalf of Viscount Rothermere by Mr. Donald C. Parker, Vice-President of Price (Nfld.) Pulp and Paper Limited, and Mr. Walter Tucker, Mayor of Grand Falls. Also present were The Hon. Dr. F.W. Rowe, M.H.A. for Grand Falls, Dr. A.A. Bruneau, Dean of Engineering and Applied Science and Mr. W.H.M. Selby, Assistant Vice-President for Administration.

Viscount Rothermere was Chancellor of the University from 1952 to 1961, and a most generous benefactor. He made possible for the building of Rothermere House, and endowed the Rothermere Fellowships for graduate students of Memorial who are studying in Britain. He has recently endowed six Rothermere Studentships to assist undergraduate students studying at the Memorial Campus in Harlow.

It is intended that the portrait of Viscount Rothermere, painted by Anthony Christian-Howard, will hang in the Main Dining Hall.

CAMERAMUN PHOTO

The Random Thoughts of a Far From Idle Fellow

At a dinner given by the University to celebrate the publication of his book on The Place Names of the Avalon Peninsula, Dr. E.R. Seary replied to the toast of 'Seary and Avalon' proposed by the President, in a speech composed largely of Newfoundland Place Names.

Dr. Seary said: "Sir, in trying to find adequate words to thank-you for your kindness in giving this most enjoyable dinner this evening, I had hoped that by a Happy Adventure some Conception might have Come by Chance to my Heart's Content and your Heart's Delight, but Blow me Down, my head was like an Empty Basket, Witless person and though I gave my brains many a Buffet, I found myself with Little Heart's Ease, in Confusion Bay rather than in Comfort Cove, with little to Salvage from the Random thoughts that I Seldom Come By. One rarely responds to a Tickle when one has touched the bottom of Bay d'Espoir and, in one's Barenseed, has to resort to Bottom Bluff and keep one's Clapper shut.

"But this jeu d'esprit has now reached Ragged Point, if not Folly Point, and I think I should now find a Hole in the Wall to hide in, or a Whisky Pond to drown in, or, as a last resort, try to talk sense.

"And I think I can best do that by thanking once again all those who helped me in the research and preparation of the book: my wife, who has lived with my toponymic obsessions for so long but has never failed to give aid and comfort and understanding in the midst of my ponderings, theorizing and professional absent-mindedness; you sir, Dr. Winter, Vice-President Morgan and Dean Harris who have not only smoothed my path but, indeed, paved my way; George Story, recently benighted, a fount of erudition and wisdom, despite his youth, to whom I never turned in vain for help; stiff whisky Dave Pitt, who relieved me of so many of the time-consuming details involved in the direction of a large Department; and Sheila Lynch, who, in the last stages, checked references and read proofs and cheered me with tea. My thanks to all of you now that I have reached, I hope, Harbour – Grace be to God."
Summer Session
Asst. Director Appointed

Roy Stoodley, the co-ordinator of off-campus courses at Grand Falls, has been temporarily appointed Assistant Director of Summer Session at Memorial.

Mr. Stoodley’s appointment is for the duration of this year’s Summer Session. He will return in the fall to Grand Falls where he is the co-ordinating principal of Grand Falls Academy.

Mr. Stoodley has a B.A. (Ed.) from Memorial University and M.Ed. from the University of Toronto.

Summer Session

Registration for this year’s Summer Session shows a decrease from previous years. A total of 2,613 students registered for the 1971 Summer Session, compared with 3,293 in 1970.

The drop has been attributed to the increased enrolment this year in third semester and off-campus courses. Over 2200 students registered for courses in the Spring Semester.

There are 121 courses being taught at this year’s Summer Session, employing 109 instructors.

Courses have been cycled into time slots and classes are conducted from 9 a.m. to 6 p.m. The result of this has been a much smoother operation with respect to room allocation and a greater use of library facilities.

Another innovation this year was the publication of a tentative list of Summer Session course offerings for 1972. This, along with advance notices of Evening Course offerings on and off campus, is designed to help students with long-term planning of their University program.

Former Assistant Registrar Dies

Miss Dorothy Pearson, a former Assistant Registrar at Memorial University, died at her home in Ottawa July 13.

Miss Pearson was born in Ottawa and received her B.A. from Carleton University. She joined the overseas unit of the Red Cross during World War II, and served in London.

In 1956 Miss Pearson became secretary to the Registrar at Memorial University. In 1963 she was appointed Assistant to the Registrar, and became Assistant Registrar in September 1964, a month prior to her resignation.

Miss Pearson returned to Ottawa where she worked in the National Library until her death. She is survived by one sister, Mrs. Elsie Crane.

Civilization series companion produced

Lord Taylor, President of M.U.N., has prepared a set of notes to accompany the television series on the History of Civilisation produced by the BBC with Lord Clark.

In teaching General Studies to first year engineering students, the President has been making use of the set of thirteen fifty-minute films “Civilisation”. For the benefit of the students, Lord Taylor has prepared a ‘Companion to the series “Civilisation”’ to overcome the problem of taking notes in a filmed lecture.

In view of the fact that the CBC is again transmitting Lord Clark’s lectures at 10:30 p.m. on Tuesdays, some readers of the Gazette may care to obtain copies of the Companion which is available from the M.U.N. Bookstore at $1.00 each.
New regulations to govern campus traffic

New Campus Traffic Regulations are now in effect. The regulations, introduced early this month, are designed to reduce the severity of penalties for parking violations without reducing the Security Office’s powers of enforcement.

Copies of the new regulations are available at the Security Office in T8-2 (Ext. 2503). Mr. J.A. Cook, chairman of the Traffic & Parking Committee, said the new regulations would offer no disadvantage to persons who had received their decals under the old regulations. However he advised all persons who park on campus to obtain copies of the new regulations.

Parking is a continuous problem at Memorial. The available lots will reasonably accommodate 1,740 vehicles, and during the past year about 8,000 permits were issued, including numerous short term permits.

Lots 8 and 20 are now closed and the closure of Area 6 is a probability. However the undeveloped fringe areas of Lot 19 can hold considerably more vehicles with minimal work.

Heads of Departments have been requested to submit priority lists of faculty, staff and graduate students. The Traffic Committee will assign lots based on the overall returns, and the Committee is hopeful that departmental control of individual allocation will allow for full utilization of space.

The staff, student and faculty members of the Traffic & Parking Committee agree that campus traffic should be controlled without resort to indiscriminate ticketing or impounding of violators. The Committee hopes that better public relations combined with its willingness to review particular circumstances will hold in check parking violations on campus.
University appoints three liaison officers

Three new appointments to the staff of Memorial University were announced recently, and a fourth appointment will be made later this month.

Donald M. Balsom, Ulrich Nikolai and Martin P. Steele were appointed as Liaison Officers to assist in the University's program in areas of the Province outside St. John's. Part of their function will be to assist Coordinators of off-campus courses in the various centres throughout Newfoundland and Labrador, but they will be engaged as well in the Extension program and Alumni Affairs. These officers will act as a source of information for the University — distributing University application forms, calendars, bulletins, etc. — and might generally be regarded as the arm of the University extending into the Newfoundland community.

Mr. Balsom was born in St. John's and educated at Clarenville. He graduated from Memorial University in 1970 with a B.A. (History) and is now completing courses toward a B.Ed. degree. His work experience includes service with the Centennial Commission in British Columbia in 1967 and one year as Vice-Principal of Victoria School at Gaultics. He is married to the former Marilyn Duffett of St. John's. Mr. Balsom has been appointed Liaison Officer for Central Newfoundland with headquarters at Grand Falls. He will be concerned mainly with the off-campus centres at Baie Verte, Springdale, Grand Falls, Lewisporte, New World Island, Fogo Island, Gander and Milltown-Baie d'Espoir.

Mr. Nikolai comes from Edmonton, Alberta. He has a B.A. in History and English and has completed an additional year in the Faculty of Education at the University of Alberta. He has taught at Stephenville and at the Robert Leckie High School, Goose Bay. Mr. Nikolai's area includes Labrador and the Great Northern Peninsula. He will be stationed at Happy Valley, Goose Bay from where he will serve the off-campus centres at Labrador City-Wabush, Goose Bay, St. Anthony and Flower's Cove.

Mr. Steele received his high school education at Bishop Field College, St. John's, and graduated from Memorial University with a B.A. (Ed.) degree. He taught school at New Harbour, St. John's, Wabush, and at Catalina where he was Vice-Principal for three years and Principal one year at the high school there. He is married and has three children. Mr. Steele is the Liaison Officer for the Bonavista and Burin Peninsulas. He will live at Clarenville and work with the off-campus centres at Wesleyville, Catalina, Clarenville and Grand Bank.

The fourth officer who will be appointed later this month for the west coast will have headquarters at Corner Brook and will serve the centres from Cow Head to Port aux Basques.

MUN marksmen take first in national finals

Claude Pike of Corner Brook and Ed Kirby of St. John's both received first place awards at the National Sporting Rifle Matches held at Sudbury, Ontario on July 16, 17 & 18. Pike captured the Sharpshooter Prone event by edging out fellow Newfoundlander Louise Harris of Glovertown, the second place winner.

Kirby added to the Newfoundlander's victories by winning the Sharpshooter National Course (three-Position) match.

Harris also took fourth place in the Ladies Grand Aggregate.

In the provincial team match open to teams representing each of the ten provinces and two territories, the Newfoundland team of M.U.N. students Pike, Harris, Kirby and Emmanuel Ford, of Fogo placed third with a score of 2225 points. This score was 10 points behind second place Nova Scotia and only 18 behind the winning Ontario team.

All shooters were members of the Memorial University Rifle Club.
